-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wool (5174753). Wool shows a bracket 91, Fig. 12, arch wire as shown, slot having angled surfaces 81, 85, 87, and matching arch wire surfaces 73, 75, 79 in order to effectively exert torque, column 8, lines 29-33. The specific torque tolerances that are used is an obvious matter of choice in the degree of a known parameter to one of ordinary skill in the art. As to claim 2, Wool shows embodiments in figures 17(a) – 17(i), also matching bracket shapes, column 10, lines 62-65, that show different angled surfaces that, as shown, some of them are slanted at approximated 45 degrees, however, Wool does not specifically state the angles used. The specific angled used is also an obvious matter of choice in a known parameter in order to obtain a desired force to one of ordinary skill in the art. As to claim 4, see Fig. 15. As to claims 6 and 7, Figs. 17(e) and 17(f) show parallel top and bottom sides and a slanted intermediate side, the specific angles used are obvious matters of choice in known parameters to the skilled artisan. As to claim 9, see Fig. 17(k).

Drawings

The drawings filed September 10, 2003 have been found to be acceptable by the examiner.

Conclusion

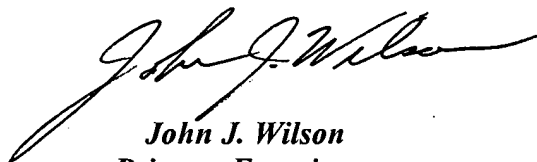

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Napolitano (4850865) shows matching bracket surfaces and arch wires.
